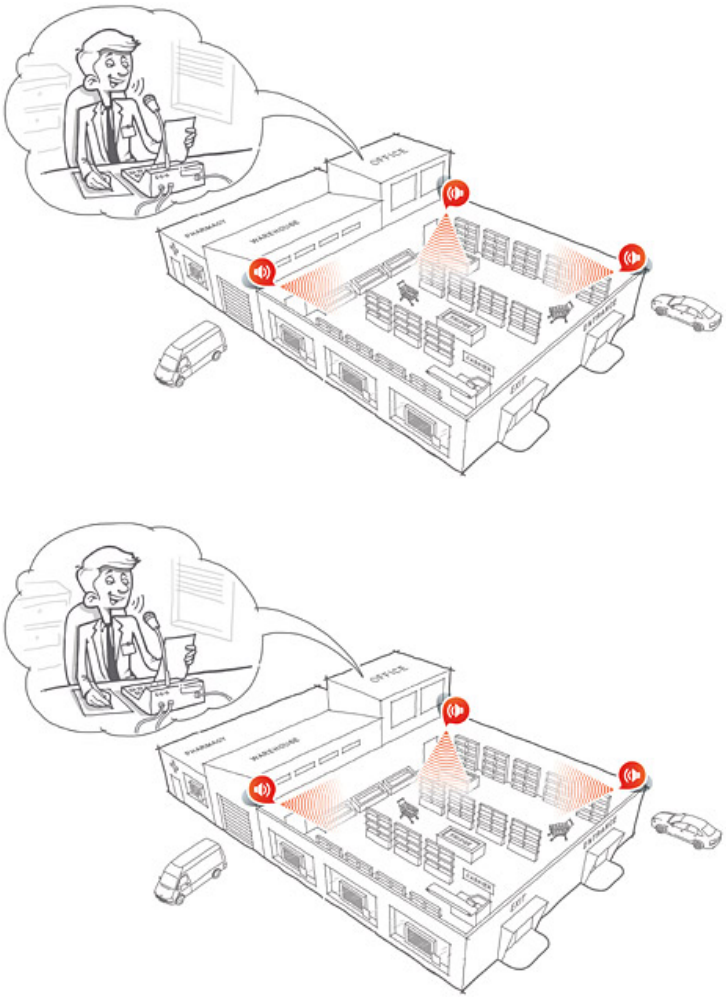
Simple Paging

Make Public Address Announcements over your network



Simple

The Barix Simple Paging Solution delivers crisp and clear Public Address announcements in specific zones or throughout your facility. No new wires - the system uses the IP network infrastructure already in place as the system backbone. With automatic discovery and self configuration, installation and expansion of the system is a cinch !

Paging

Using a stationary paging device or your iPhone / iPad over wifi:
Select zones, push a button and start talking - anyone can operate the system !
Hallways, platforms, parking structures - wherever you need to make yourself heard !

Solution

A server-less, self configuring system which is super easy to set up. Add paging stations and zones, authorize iDevices as your needs to expand the system emerge. No central servers, no software to install on computers - less components means higher reliability !
Functionality and ease-of-use at its best - from Barix, the voice of simplicity.

KEY FEATURES

Benefits for the User

- Affordable, modular paging solution using your network infrastructure
- Make announcements from paging station or iPhone/iPad
- Superior audio quality
- Multi-zone system with busy/offline indication per zone
- Make announcements selectively into one, some or all zones.
- Low power and no maintenance cost, no PC or server needed
- Easily add zones and paging stations as you expand the system

Benefits for the installer

- Uses existing network infrastructure, no need for dedicated wiring
- Simple installation, typically zero configuration needed
- Easily expandable by just adding more devices
- Reliable operation without dependency on a server
- System can be installed on both, managed as well as unmanaged networks
- Practically no system training necessary

APPLICATIONS

- To reach staff wherever they are in the building; doctors, teachers, warehousemen, whoever you need
- To reach people from wherever you are on campus in response to live events; principals, security guards, janitors, or other personnel
- To selectively announce information to specific zones
